

**9h15**                      **Welcome coffee**

**10h00-12h45: Session 1**

10h00	15'	Introduction
10h15	15+5	<i>Involvement of small GTPases in treatment-induced phenotypic plasticity of lung cancer cells</i> <b>Olivier CALVAYRAC</b> (CRCT, Toulouse)
10h35	15+5	<i>Study of the impact of ARHGAP35 mutations in endometrial cancers</i> <b>Mathilde PINAULT</b> (BoRdeaux Institute of onCology BRIC, Bordeaux)
10h55	15+5	<i>Identification of novel RHOB partners in the MAPK signaling pathway</i> <b>Stéphanie CABANTOUS</b> (CRCT, Toulouse)

**11h15**                      **Coffee break**

11h45	15+5	<i>Polarity axis establishment ensures switch-like cell cycle transitions via Cdc42 signaling</i> <b>Derek McCUSKER</b> (IBGC&IECB, Bordeaux)
12h05	15+5	<i>Coupling spindle positioning to cytokinesis: cell cycle control of the small GTPase Tem1 in budding yeast</i> <b>Simonetta PIATTI</b> (CRBM - UMR5237-CNRS, Montpellier)
12h25	15+5	<i>Two RhoGEF isoforms promote asymmetric stem cell cytokinesis through distinct mechanisms</i> <b>Anne ROYOU</b> (IBGC&IECB, Bordeaux)

**12h45**                      **Lunch break**

**14h15-16h30: Session 2**

14h15	15+5	<i>Macrophage morphological plasticity and migration: a live study</i> <b>Karima KISSA</b> (LPHI - UMR5235-CNRS, Montpellier)
14h35	15+5	<i>Rab27a : a possible connection with autophagy ?</i> <b>Mireille VERDIER</b> (Captur, Limoges)
14h55	15+5	<i>Rnd3/RhoE in hepatocellular carcinoma: from the regulation of its expression to its role in disease progression</i> <b>Sara BASBOUS</b> (BoRdeaux Institute of onCology BRIC, Bordeaux)
15h15	15+5	<i>Role of Rho family GTPases in Chronic Myeloid Leukemia Stem Cells treated with Tyrosine Kinase Inhibitors</i> <b>Nicolas BOURMEYSTER</b> (STIM, Poitiers)
15h35	15+5	<i>Targeting small GTPases with intracellular antibodies to define novel therapeutic strategies in cancer</i> <b>Nicolas BERY</b> (CRCT, Toulouse)
15h55		<i>Discussion &amp; conclusion</i>

**16h30**                      **End of the meeting**
